

BJ Gridhar

Software Engineer, Undergrad

📞 +91 7386332704 | ✉ bjgiridharyadav@gmail.com | 🔗 [linkedin.com/in/bj-gridhar](https://www.linkedin.com/in/bj-gridhar) | 🐙 github.com/giri69

Work Experience

Paypal

Jun 2025 - Aug 2025

Software Engineering Intern

- Built internal automation tools with **Spring Boot** and PayPal's in-house framework, improving developer **productivity** and workflow efficiency.
- Optimized internal workflows, reducing average developer waiting time by **10%** and boosting team productivity.
- Collaborated with senior engineers to design **scalable solutions** and automate **BIF queries**, ensuring seamless integration with existing systems.

Hike

Sep 2025 - Oct 2025

Software Developer Intern

- Designed and developed high-quality games using **Unity (C#)**, focusing on **performance** and visual fidelity.
- Implemented backend using **VirtualWallet** and **Redis** for player pooling and matchmaking systems for high-traffic cases.

Myraa Technologies

Nov 2023 - Jan 2024

Frontend Developer Intern

- Built **high-traffic**, responsive web apps using **HTML**, **CSS**, and **JavaScript**, focusing on **scalability** and user experience.
- Collaborated with backend engineers to integrate APIs, ensuring seamless functionality and performance.
- Used **Bitbucket** for version control, contributing to a dynamic and collaborative development workflow.

Projects

Korosuke - AI-Powered Document Security System | Python, langchain, RAG, FastAPI, Vector DB

[Link](#)

- Built **machine learning-powered** document retrieval system processing 2,300+ enterprise documents with role-based access control using **Python**
- Implemented **AI algorithms** for security-aware document classification and policy-based filtering with custom embedding models and similarity scoring
- Designed modular **FastAPI** backend architecture with authentication workflows, audit logging, and scalable database integration for enterprise compliance

cUrlBaby - Enterprise API Testing Framework | Java, Multithreading, HTTP/TCP, JSON

[Link](#)

- Developed enterprise-grade **Java** CLI application using advanced **OOP design patterns**, multithreading, and custom JSON parsing
- Implemented **concurrent request processing** with thread pools, timeout management, and comprehensive error handling for high-throughput testing
- Applied **software engineering principles** including SOLID design patterns and modular architecture, achieving **40% improvement** in testing efficiency

NexCall | Real-Time Video Conferencing Platform

[Project Link](#)

- Built a high-performance video calling application using Next.js and TypeScript, featuring meeting scheduling, personal rooms for instant meetings, comprehensive meeting controls, and historical meeting reviews.
- Implemented secure authentication and access control using Clerk, and designed a responsive, user-friendly UI with Shadcn components and Tailwind CSS.

Technical Skills

Programming Languages

Java, Python, JavaScript/TypeScript, C/C++, SQL, Go

AI/ML & Data

LangChain, Vector Databases, Data Structures & Algorithms

Frameworks & Technologies

React.js, Node.js, Express.js, FastAPI, Next.js, Spring Boot, RESTful APIs

Databases & Cloud

MongoDB, MySQL, PostgreSQL, Redis, AWS (EC2, Lambda, S3), Docker

Tools & Methodologies

Git, CI/CD, Agile, System Design

Education

SRM University, Andhra Pradesh

Sep 2022 - Jul 2026

B.Tech in Computer Science and Engineering (AI & ML)

CGPA: 9.0/10.0

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Software Engineering, System Design.

Leadership & Achievements

- **Leadership:** Technical Lead, **Google Developers Group**, Organized and led technical events to promote developer learning and technology culture.
- **Problem-Solving:** Earned a **3* rating** on **CodeChef** and solved 500+ algorithmic problems on **Leetcode**
- **Hackathons:** Won ETHGlobal; active participant in many national-level hackathons including SIH, Unfold, and ETHIndia.
